## INTRODUCTION:

An Online Quiz System is a digital platform designed to conduct quizzes, tests, and assessments over the internet. It serves as a versatile tool for educators, students, and organizations, facilitating efficient, interactive, and accessible evaluations.

The primary aim of an Online Quiz System is to provide a convenient and effective means of assessing knowledge, skills, and competencies. It eliminates the need for physical presence, allowing users to participate from any location using a device with internet connectivity.

## PROBLEM STATEMENT:

Traditional quiz and assessment methods can be time-consuming, inefficient, and challenging to manage at scale. Many educational institutions, training programs, and organizations require a streamlined, accessible platform for conducting quizzes and assessments.

Without an efficient system, there can be delays in grading, limited access for users, and difficulty in tracking progress and results.

Specific challenges include:

- Accessibility
- Automation
- Security

## OBJECTIVES:

The primary objective of the online quiz platform is to develop an intuitive, scalable, and feature-rich solution that enables users to create, take, and track quizzes in a convenient, efficient, and engaging manner.

- . User Engagement & Accessibility
- . Customizable Quiz Creation
- . Instant Feedback & Real-Time Analytics
